1 VERSION 7.6.2 rc13 RELEASE NOTES

1.1 NEW FEATURES AND ENHANCEMENTS

This document describes the new features and enhancements that have been added to the **DYNASTAR** products, version 7.6.2rc13

1.2 SFTP

- Various fixes to make new SFTP file transfers work with various SFTP clients' software packages. Note that some packages perform faster than others.
- If radius in use, radius password required to reboot or delete files. Only admin radius users can reboot or delete files.
- SFTP will prevent multiple opens e.g. upload a file while already downloading another file

1.3 SSH

- Security banner used with SSH login only appears once, before login.
- System identification information now appears during the SSH login.
- RADIUS logging of username when using SSH now functions properly

1.4 Protocol port blocking

- If an IP "Open Ports" scan is performed, various ports were found to be open, even when the particular feature was not in intended operation. This release changes the behavior of "Open" IP port numbers.
 - Block SNMP if no community string or not configured
 - Block XOT, STUN, DHCP, SNTP if not configured.
 - Send ICMP Port Unreachable for filtered UDP packets

1.5 Serial Ports set for TRANSPARENT operation.

If the DS1500/2000 product was configured as the "Terminal Server" product variant and the serial ports were set for "Transparent" port operation (bit protocols), then the *TxDelay* and *Line Idle* configurations parameters are not available, this version brings back those parameters.
